EDUCATION

De La Salle University — Manila, NCR

Bachelor of Science in Computer Science, Major in Software Technology, Minor in Data Science — *Sep. 2023 – Expected 2027*

- CGPA: 3.841 (as of AY 2025-2026, Term 3)
- Honors: First Dean's Lister
- Scholarship: DOST-SEI JLSS Merit-Based Scholar
- Relevant coursework: Empathic Computing in Human-System Interaction, Human-Computer Interaction, Research Methods, Advanced Intelligent Systems, Principles of Data Science, Statistical Modeling and Simulation

Saint Jude Catholic School — Manila, NCR

STEM - Engineering Highschool Graduate — *2007 – May 2023*

- Grade 12 Final Average: 95 (AY 2022 - 2023)
- Honors: With High Honors, Msgr. Charles Tchou Conduct Award, Saint Jude Catholic School Service Award
- Winning essay, Harvard Alumni for Global Women's Empowerment essay contest (2022)

RESEARCH AND PUBLICATIONS

CLive: An LLM-Supported Process Tutoring System for Introductory C Programming — 2026 – Present

Undergraduate thesis; advisers: Dr. Thomas James Tiam-Lee, Dr. Rhodora Abadia — *De La Salle University*

A tutoring system that teaches the process of solving a programming problem rather than supplying a solution, scaffolding novices through the PCDIT framework from problem definition and concrete cases to algorithm design, implementation, and testing. The study asks whether stage-aware guidance produces better problem-solving behavior than unstructured hints or direct answers. Prototype testing is underway; the experimental study runs in November 2026.

Apparent Age Estimation: Challenges and Outcomes – A Comparative Analysis on Apparent Age Estimation Methods and Datasets — 2026

26th Philippine Computing Science Congress; adviser: Abien Fred Agarap — *De La Salle University*

Applied distribution learning techniques, mean-variance loss and adaptive mean-residue loss, to the DEX method and evaluated them on IMDB-WIKI, APPA-REAL, and FairFace for both accuracy and fairness. AMRL reached state-of-the-art accuracy, but trade-offs against demographic equity persisted: saliency maps showed inconsistent feature focus across demographics and marked degradation for Asian and African American populations. We argue that technical improvements alone are insufficient without localized datasets and fairness validation protocols.

Towards More Empathic Programming Environments – An Experimental Empathic AI-Enhanced IDE — 2026

26th Philippine Computing Science Congress; adviser: Jocelynn Cu — *De La Salle University*

Built Ceci, a Caring Empathic C IDE for novice programmers that prioritizes learning and emotional support over direct code generation, and ran a comparative pilot ($n = 11$) against VS Code with ChatGPT using the NASA-TLX workload assessment and a post-test usability survey. No significant difference emerged in perceived effectiveness, learning, or workload, though Ceci users reported significantly greater perceived helpfulness in error correction ($p = 0.0220$), suggesting empathic responses alone may not improve learner outcomes.

PROJECTS

AnimoRank | *TypeScript, SvelteKit, PostgreSQL (Prisma), Judge0, Docker* | animorank.com — 2026

- Assisted in building a web platform where instructors author C problem sets and students solve them in an in-browser editor, with submissions graded by a self-hosted Judge0 runner
- Deployed for CCPROG1 students at **De La Salle University**; serves as the platform for my undergraduate thesis

WIKI-SEA-FACE | *Python (scikit-learn, torch, lightning)* 2026
- Created a machine learning dataset by scraping Wikidata for Southeast Asian faces with gender and age labels
- Finetuned an InceptionResnetV1 model pre-trained on VGGFace2 to predict gender, achieving a 92.2% F1-score

An Analysis on Competitive Pokemon Teams | *Python (jupyter, pandas, numpy, scikit-learn, matplotlib, seaborn)* 2025
- Analyzed Gen 5 OU Pokemon battle data from the Pokemon Showdown platform to determine metagame trends

FrogCritic | *HTML/CSS, Bootstrap, JavaScript, MongoDB, Node.js, Express.js* 2025
- Developed a full-stack video game review web application with a MongoDB database
- Collaborated effectively as part of a three person team
- Submitted for a web development course in **De La Salle University**

A Video Game Music Database | *SQL* 2024
- Designed and implemented a video game music database schema and expected common database operations
- Submitted for **CS50SQL 2024**

AnimeList | *Java, SQL* 2024
- Collaborated with a team of four to develop a GUI app with an SQL database using the MVC framework
- Submitted for an information management course in **De La Salle University**

Simple Start Page Maker | *HTML/CSS, Python* 2024
- Streamlined the creation of custom web browser homepages through a GUI
- Submitted for **CS50x**

Experience

Student Tutor May 2024 – Present
Peer Tutors Society *De La Salle University*
- Tutor undergraduate students in computer science coursework, chiefly introductory programming

Organizations

Chair, Research and Academics Sep. 2025 – Aug. 2026
CATCH2T27 *De La Salle University*
- Improved student quality of life through data-driven initiatives

Associate Vice President, Academics Committee Sep. 2025 – Sep. 2026
Peer Tutors Society *De La Salle University*
- Helped draft educational computer science material such as practice quizzes for students

Associate Editor 2022 – 2023
The Judenites *Saint Jude Catholic School*
- Led and oversaw the general operations of the official school publication
- Taught key aspects about news writing as a resource speaker in a workshop hosted after my term

Additional Certifications

Amazon Web Services
AWS Certified Cloud Practitioner (CLF-C02) *2026*
Harvard University
CS50x: Introduction to Computer Science *Apr. 2024*
CS50SQL: Introduction to Databases with SQL *Dec. 2024*

Technical Skills

Languages: HTML/CSS, JavaScript, Python, Java, SQL (SQLite, MySQL, PostgreSQL), C, LaTeX
Frameworks: Node.js, Bun, Express.js, Next.js, Handlebars, Bootstrap
Developer Tools: VS Code, Git, GitHub, Docker, Figma, AWS
Libraries: `numpy`, `pandas`, `scikit-learn`, `torch`, `lightning`, `tensorflow`, `opencv`, `matplotlib`, `seaborn`

Languages

Native or bilingual: English, Filipino
Elementary: Japanese (JLPT N5), Chinese
